Emmanuelle Mboudo

Software Development or DevOps Internship

Master's student (year 2) | Available for 5–6 months from April 2027
emmanuelle.mboudo@outlook.fr | linkedin.com/in/emmanuelle-m-a138a1195
randomuserlt.github.io

Mobility — Mainly Île-de-France and Auvergne-Rhône-Alpes. Also open to the rest of France and abroad.

Professional Experience

Full-Stack Development Intern | SARIS-Congo, Somdia Group | May to July 2026
Java, Spring Boot, Angular, TypeScript, PostgreSQL — Gathered requirements and built an MVP for patient records, consultations, prescriptions and pharmacy stock.

Application Development | Univers Numérique Services (UNS) | Remote | 2025
Java, Angular (SPA), TypeScript, Bootstrap — Built an electronics inventory tracking brand, device type, intake date and initial condition, with inspection and replacement alerts.

Academic Projects

DevOps and CI/CD — Cloud Infrastructure and Automated Deployment | 2026
OpenTofu, Ansible, Docker, Traefik, GitLab CI/CD, OpenBao, OVH, MySQL, DNS — Automated infrastructure provisioning and deployment.

Middleware and Microservices — Timetable Synchronisation | 2026
Go, API REST, NATS JetStream, SQLite, iCal — Synchronised calendars and generated alerts.

Java Back-End — REST API for a Donation Platform | 2026
Java, Spring Boot, Spring Security, H2 — Built an API for browsing listings using a layered architecture and DTOs.

Stream Processing — Transaction Processing with Apache Kafka | 2026
Apache Kafka, Kafka Streams, SQL — Validated 600 transactions with exactly-once processing and idempotent writes (UPSERT).

Web and Mobile Development — Podcast App | 2026–present
Java, Angular — Ongoing CAAS project for listening to podcasts on the web and on mobile devices.

Software Quality — Refactoring a Java Application | 2025
Java — Refactoring, testing and continuous integration.

Operations Research — Assembly Line Peak Power Optimisation | 2026
Python, PuLP/CBC, OR-Tools — Reduced peak power by 15–31% compared with the heuristic on the test instances.

Front-End Web Development — Built a website with HTML, CSS and JavaScript. | 2023
Java and SQL — Conway's Game of Life with a graphical interface and SQL data storage. | 2023
Networking and Protocols — Message transfer using visual encoding inspired by QR codes. | 2025
Applied Cryptography — Implemented and compared cryptographic techniques in Python. | 2023
Languages and Compilers — ANTLR grammar for expressions involving complex numbers. | 2025
Low-Level Programming — Stored and retrieved data using assembly language. | 2025
Computational Complexity — Polynomial-time 3-SAT to graph reductions (Python, SageMath). | 2024
Modelling and Simulation — Simulated animal reproduction in C using the Fibonacci sequence. | 2023
Data Analysis — Analysed fisheries data using R. | 2026
Game Development — Built a ping-pong game in Unity (C#). | 2023
Game Programming — Built two versions of Sokoban, in C and Java. | 2023

Technical Skills

Development: Java, Spring Boot, Go, Python, C, C#, TypeScript, Angular, Bootstrap, REST, TDD
Data and Messaging: SQL, R, PostgreSQL, MySQL, SQLite, H2, Apache Kafka, NATS JetStream
DevOps : Git, GitLab CI/CD, Docker, Ansible, OpenTofu, Traefik, OpenBao, Linux, Windows

Education

Master's in Computer Science, GLIA track | Université Clermont Auvergne, ISIMA | 2025–present
Second year in progress. First year completed.

Bachelor's Degree in Computer Science | Université Clermont Auvergne | 2025

Languages — English (B2)
